CHAPTER XXI.

A Perilous Honeymoon. Never was day so largely and gloriously blue since Courtland was a city as the first morning of the married life of Maurice and Margaret von | we must plan. To-night we will cer-Lynar, Count and Countess von Loen. The summer floods had subsided, and the tawny dye had clean gone out of the Alla, which was now as clear as Maurice, you must be taken ill-lie aquamarine, and laved rather than down on this couch away from the

Summer Palace. The Princesses (so they said without) were more than ever inseparable. They were constantly talking confi- may stave off with this. It is the dentially together, for all the world like schoolgirls with a secret

"There is something toward today," said a decent widow woman who lived in the Konigstrasse to her neighbor. "My son, who as you know is a chorister, is gone to practice the Wedding Hymn at the cathedral. I am going thither to get a good place. I will not miss it, whatever it is. Perhaps they are going to make the Princess Joan do penance for her fault, in a white sheer with a candle in her hand a yard long! That would be rare sport. I would not miss it for so much as four farthings!"

And the chorister's mother hobbled off, telling everybody she met the same story. And so in half an hour the news had spread all over the city, and there began to be makings of quite a respectable crowd in the Dom

It was half past eleven when the archers of the guard appeared at the entrance of the square which leads from the palace. Behind them, rank upon rank could be seen the lances of the wild Cossacks of Prince Ivan's escort who had remained behind when the Muscovite army went back to the King Leopold and Capt. Putnam Russian plains. Their dusky goat's-Bradlee Strong are both keeping out hair tents, which had long covered the banks of the Alla, had now been struck and were laded upon baggage horses and sumpter mules.

Meanwhile, in the river palor of the "that trust in chariots, because they Summer Palace, the two Princesses sat on a low stool, leaning her on her companion's knee. And though ed to have increased Kitchener's pres- she sometimes looked away, it was whisper, "we must put off this mar-

SEES LACK IN GARDENS. American Landscape Inferior, Says a

Magazine Writer. The American landscape, even in he older parts of the country, is generally unkempt, and does not lend itself as readily to formal treatment as loes the typical English or continental landscape. The owners of the big esates rarely appreciate the scale on which the landscape architecture should be laid out, and the patience which is necessary to obtain a complete and consummate effect. They want ready-made estates. Finally, the eading American house architects have, with a few exceptions, a good deal to learn about the technique of landscape design. So far as the large house itself is concerned, a convention has been established which in the main is a good convention, but the designing of gardens is still in an early experimental stage. The stage properties are collected in abundance. There is no lack of pergolas, fountains, well-heads, gazebos, statuary and pottery; but as like as not they are indiscriminately placed. The architecural features are, however, generally somewhat better managed than the danting, which frequently looks as if an Irish gardener had been given some cague general directions, or as if the ady of the house had considered that I was a woman's business to make the however, the lady of the house, in case she has her own way, generally plants the garden vellow and red rath-

was the custom in Courtland) she car-Stones That Mark Border Are Badly Disarranged. Mason and Dixon's line has been reset by Pennsylvania and Maryland, and with so much care and thorough ness that it promises to require no more attention for a very long period

It had been badly disarranged, many of the marking stones and posts having been carried away in the nearly 140 years since they were set by Charles Mason and Jeremiah Dixon, two eminent English mathematicians and sur-Then with deft hand she opened the less liquid into a cup she gave it him

These gentlemen were employed t mark out the disputed boundary line between the state of Pennsylvania and the states of Maryland and Virginia. They began in 1763 and concluded in 1767, having been interrupted, when within thirty-six miles of the whole distance to be surveyed, by the hos tile Indians.

The stones that marked the miles were brought from England, those at each mile having the initial P on one swallow one of these pellicles, and in side and B on the other, and the five mile stones having the arms of Baltinot suffering from a dangerous dismore on one side and those of William Penn on the other

The term "Mason and Dixon's line, was used by John Randolph in the debates on slavery, before the admission of Missouri, as figurative of the division of the two systems of labor. It became popular as a phrase to denote the border line between the free and slave states, and was used in that sense up to the civil war.

"Danger there is, dear mistress," she said softly, "but not, I think, so Alfonso and the Anarchist. Still a stream of anecdotes from Paris about King Alfonso. to Twenty-five. Los Angeles, Cal.: As the result of a formal proposition submitted in writing to the city of Los Angeles there is a possibility that the "Gothenburg saloon system" may be installed in this city, supplanting the present private ownership of the 200 saloons. The proposition came from 25 of the leading business men of the city,

the present proprietors at an appraised valuation.

After the license tax has been paid the stockholders of the company, under the proposed plan, would be entitled to 6 per cent dividend from the amount of their investment, the remainder of the profits from the opera-
